BT1.

```
public interface Mail {
    void sendMail ( String to , String message );
    void log ( String info ) ;
}

public class MailImpl implements Mail {
    @Override
    public void sendMail (String to , String message ) {
        System . out . println ( " Sending mail to :  " + to ) ;
        System . out . println ( " Message :  " + message ) ;
    @Override
    public void log ( String info ) {
        System . out . println ( " log :  " + info ) ;
    }
~~public~~ ~~pub main~~
public class Main {
    public static void main ( String [ ] args ) {
        MailImpl ~~Mail~~ mail = new MailImpl ( ) ;
        mail . sendMail ( ) ;
        mail . log ( ) ;
    }
}
```
